Amendments to the Claims

This listing of claims will replace prior versions and listings of claims in the application:

Listing of claims

- (currently amended) A method of reducing post-surgical vomiting comprising administering to a patient <u>undergoing general anesthesia</u> a therapeutically effective amount of Doxylamine Succinate and Pyridoxine Hydrochloride.
- (original) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine
 Hydrochloride are administered before surgery.
- (original) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered during surgery.
- (original) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered after surgery.
- (original) The method of claim 4, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered after surgery at regular intervals.
- (original) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered before, during and after surgery.
- (original) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine
 Hydrochloride are administered orally.
- (original) The method of claim 7, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered orally in a delayed release formulation.
- (original) The method of claim 8, wherein the orally delayed release formulation is enterically coated.

- (original) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are formulated in a pharmaceutically acceptable carrier.
- 11. (original) The method of claim 1, further defined as administering at least about 10 mg of Doxylamine Succinate and at least about 10 mg of Pyridoxine Hydrochloride.
- (original) The method of claim 1, further defined as administering at least about 20 mg of Doxylamine Succinate and at least about 20 mg of Pyridoxine Hydrochloride.
- (original) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered before anesthesia is administered to the patient.
- 14. (original) The method of claim 1, wherein the patient is a woman.
- (original) The method of claim 1, wherein the surgery is performed on an outpatient basis.
- 16. (currently amended) The method of claim 1, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered on an evening prior to surgery, a morning of the day of surgery or immediately after surgery.
- 17. (original) The method of claim 1, wherein Doxylamine Succinate is administered before, at substantially the same time or after Pyridoxine Hydrochloride is administered to the patient.
- 18. (currently amended) A method of treating, <u>preventing or reducing</u> post-surgical vomiting comprising administering to a patient <u>undergoing general anesthesia</u> a therapeutically effective amount of Doxylamine Succinate and Pyridoxine Hydrochloride before, during or after surgery.

- (original) The method of claim 18, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered before, during and after surgery.
- (original) The method of claim 18, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered orally in a delayed release formulation.
- 21. (original) The method of claim 18, wherein Doxylamine Succinate is administered before, at substantially the same time or after Pyridoxine Hydrochloride is administered to the patient.
- (original) The method of claim 18, wherein Doxylamine Succinate and Pyridoxine
 Hydrochloride are formulated in a pharmaceutically acceptable carrier.
- (original) The method of claim 18, further defined as administering at least about 10
 mg of Doxylamine Succinate and at least about 10 mg of Pyridoxine Hydrochloride.
- (new) The method of claim 18, wherein Doxylamine Succinate and Pyridoxine Hydrochloride are administered orally.
